PRECAUTIONS

Lithium Battery Cell Warnings

- Cell leakage may cause damage to the remote control.
- Do not throw cells into fire, as this may cause an explosion.
- Keep battery cells out of reach of children.

Use cautions

- To reduce the risk of fire, electric shock, and annoying interference, do not repair yourself. Please refer serving to qualified person.
- Some MP3/WMA files may not be playable.
- Keep lower volumes to concentrate on traffic and road conditions for safety driving.
- If users' car is under sunlight for sometime, please lower the temperature inside the car then start the player operation.
- If the battery is disconnected or discharged or changed, the preset memory will be erased and must be reprogrammed.
- Installation of unit is better at a horizontal position, or if it is at an angle, it may be not working at its best situation.
- Never use force or grip the display and the buttons tightly when removing or attaching,
- Be sure to lower the volume before switching off the unit or the ignition key.

INSTALLATION

Installation Procedures

First complete the electrical connections and then check for correctness.

Installation Opening

This unit can be installed in any dashboard
Having an opening as shown above .

Insert mounting collar into the dashboard and bend
the mounting tabs out with a screwdriver.
Make sure that lock lever(※) is flush with the mounting
collar(not projecting outward).

INSTALLATION(CONT.)

- Only use speakers with 4 ohms impedance.
- Do not attach the control panel to the chassis before wiring is complete.
- The maximum current of the auto antenna is 200mA.

Wiring Connections

Remove of the Main Unit

1. Remove the metal strap from the main unit.
2. Remove the plastic trim out from the main unit.
3. Insert a bracket key into the left and right side of the main unit and draw the unit out of the mounting sleeve.

CONTROL PANEL BUTTON LOCATIONS

OPERATION

1.PWR/SRC

Press the POWER button to turn on the unit, and long press it again to turn off the unit. When the unit turns on, short press POWER/SRC button to switch the unit between RADIO, USB & CARD, BT, AUX IN, BT modes (if there are USB and SD card inside the unit).
1/. If there is no USB & SD card, then it will be only radio and Aux. When the user inserts a USB Stick or SD Card, their respective logos will illuminate on the display.

2-7.(button 1 to 6) PRESET MEMORY BUTTONS In Radio mode

To memorize the frequency, press one of the six preset buttons (1-6) hold for more than 2 seconds, the frequency is successfully stored.
Therefore there are FM1, FM2, FM3, AM1 & AM2, each band can store 6 stations, so total 30 stations can be stored.
To recall the preset memory station, press one of the preset buttons (1-6) plus the BND button for FM1, FM2, FM3, AM1 & AM2.
During USB or SD card mode, press '5/-10' button to go backward 10 tracks.
Press '6/+10' button to jump forward 10 tracks.
During USB or SD card mode, long press '5/-10' button to go back 1 folder.
Long press '6/+10' button to go up 1 folder. You can repeat this function depending on the number of folders. This button will have no function if the USB or SD card has no folders.

8. CLK

Press the CLK button once to display the real time, with time appearing on the display. Press and hold CLK button for more than 2 seconds until the time flashes. You can adjust the HOUR by pressing the >> and << buttons respectively; then briefly press the CLK button to flash the minute, and pressing the >> and << buttons to adjust the minute.
During Bluetooth mode, the clock can not be adjusted.

OPERATION

9. SD CARD SLOT

10. VOLUME adjustment

In the radio mode, rotate the volume knob to increase or decrease the volume level of the sound output. Press the volume knob, it will be switching the sequence as follows:

BLUETOOTH OPERATION

Pair and Connect

Prior to using the Bluetooth device as a handsfree system for a Bluetooth-enabled mobile phone for the first time, you must pair and connect the two devices as follows:

1. In any mode, prior to pairing and connecting, the BT logo flashes in the LCD indicating that no device is connected. To begin pairing, enable BT mode on your mobile phone.
2. When the phone finds the car audio system, the SSL name will be displayed.
3. Choose the SSL from the device list to pair and connect with the car audio system. Upon confirming, the BT logo will stop flashing.
4. When pairing is complete, the mobile phone audio will automatically transfer to the car audio system whenever a call is made or received, or when the mobile phone plays music.

Make a Call

To make a call, dial the call directly from the paired mobile phone.

Redial Last Dialed Number

Press and hold the  button on the control panel to redial the last dialed phone number.

Answer a Call

- When the mobile phone is called, the incoming telephone number displays in the LCD.
- To receive the call, press the  button on the control panel.
- To reject the call, press the  button on the control panel.

End a Call

To end an active call, press the  button.

Switch Audio Between Car and Phone

During a call, press the **VOL** knob/button to switch the audio source from the car audio system back to your mobile phone.

Adjust Talk Volume

- During a call, use **VOL** knob or **VOL +** and **VOL -** buttons to adjust the volume level.
- Use the **MUTE** button to mute sound.

Audio Streaming (A2DP)

1. Press the /SRC button to enter BT mode and display media in the LCD.
2. When a mobile device is paired, music played through that device will automatically be heard through the car audio system.
3. Press the  or  button to play the next or previous song/file on the mobile phone.
4. Press the  button to pause or resume music playback.

- 19. EQ(Equalizer) or 0 button
- 20. LOC (local) # button

Note: To operate remote, pull out the plastic from battery compartment at back of remote. Then point remote at unit and start.

TROUBLESHOOTING

If you suspect something is wrong immediately switch power off. Do not use the unit in abnormal condition, for example without sound, or with smoke or foul smell, can cause fire or electric shock. Immediately stop using it and call the store where you purchased it. Never try to repair the unit yourself because it is dangerous to do so.

■ General

No power or
no sound

Car's engine switch is not on. Turn your car's key to ACC or ON.
Cable is not correctly connected. Check connection.
Fuse is burnt. Replace fuse. Check volume or mute on/off.

■ Radio

A lot of static in
broadcast

Station or signal is too weak.
Select other stations of stronger signal level.

Preset station
is reset

Battery cable is not correctly connected.
Connect the battery cable to the terminal that is always live.

■ USB / SD

USB or SD card
is connecting but
No Sound

USB or SD card connection is not good.
Take it out and insert again.
USB or SD card is damaged or no music file inside.
Change to another USB or SD card, or record music inside it.

SPECIFICATIONS

General

Power supply Requirement :	DC 12V
Maximum power output :	50W X 4CH
Speaker impedance :	4 - 8 Ohm
Unit Dimensions(WxHxD) :	7.0 X 2.0 X 3.8 inch
Weight :	1.54 Lb (0.7 kg)
Fuse :	5 A

RADIO

FM

Frequency Range USA / EUROPE:	87.5 MHz - 107.9 MHz / 87.5 MHz - 108.0MHz
Channel step:	200 KHz / 50 KHz

AM

Frequency Range USA / EUROPE:	530 KHz - 1710 KHz / 522-1620 KHz
Channel step:	10 KHz / 9 KHz

USB/Card

Usable Audio Formats	MP3/WMA
Pre-amp Output.....	Front and Rear
Frequency Response	20 Hz - 20 KHz
S/N Ratio	60dB

BT

BT Profile supports	Headset, Handsfree and A2DP & AVRCP profiles
Range of frequency	2.4GHz spectrum
